UTAH LYME DISEASE ALLIANCE

Volume 1, Issue 1

January / February 2016

Dear Utah Lyme Friends,

Welcome to our January/February Newsletter!

Utah Lyme Disease Alliance started the year off great with a wonderful presentation by Dane Boggs of Florida. He gave a presentation on Frequency Generators, specifically the GB 4000, plus MOPA amplifier. He acquired Lyme disease and through many trials and error found his way to rifing. He feels it saved his life. See page 3 for an update about the meeting.

Dane was kind enough to send ULDA 2 GB 4000's to use for 2 months Free!. If you are interested in seeing them and trying them out, please contact Lori 801-390-4444 layton-holts@msn.com in the Layton area or Chrystal 801-472-3917 crystal_wagner@yahoo.com in the Lehi area.

The February Support meeting will be in Layton. This will be 100% support and an opportunity to see the GB 4000 and try it out for Free.

The March 19th Support Meeting from 1pm-3pm will be a presentation by... - still waiting on confirmation. There will also be an ULDA fundraiser at Panda Express! 10555 S. Redwood Road location, (next to the library) from 3pm-7pm. Need to present a voucher, either copy or electronic, when you order. See website or Facebook for a link and more information. We'll have some flyers at the meeting, too.

Calling All Volunteers ♥

We welcome you to join us as a volunteer! There are many ways, small and big, that you can help our organization in furthering awareness and understanding about Lyme disease in the state of Utah.

□ It might be as simple as contacting members to collect their Lyme sto-

ries or to check on their progress.

□ If you have talents that you would like to offer (writing, computer, design, performing, other) let us know!

□ You can help us with planning meetings and events.

All are welcome at our meetings held the first Wednesday of every month at 11:00 in Lehi. (NOTE: February meeting will be Feb. 17th)

9) If that doesn't work for you, your input by email or phone call is always welcome!

2016 Tentative Schedule

- February 20th Support – Layton Central Branch
155 N. Wasatch Blvd., Layton 11am-1pm
- March 19th 1pm-3pm
South Jordan Library - 10673 Redwood Road.
Plus, a Fundraiser at PANDA EXPRESS! 3pm-7pm
Present ULDA fundraising voucher at time of purchase. (Paper copy or Electronic okay)
- April 16 Support – small regional groups
- May 21 Awareness Activities TBD: Demonstration / Benefit Concert /Gala
- June 11 Support – small regional groups
- July no meeting
- August 13 Lyme Family Picnic
- September 17 Presentation TBA
- October 8 Presentation TBA or Support – small regional groups
- November 12 Pampering Social
- December no meeting

Please contact us if you have ideas for Support Meetings or any Awareness programs we could implement.

Next Mtg: Wed. March 9th

My Lyme Data

Data is being collected from patients nationally making this the largest study of chronic Lyme disease ever conducted. Things being investigated:

1. What is the natural course or progression of Lyme disease?
2. Which treatments are most effective?
3. What factors predict poor outcomes?
4. What harms or risks associated with different treatments?
5. Can Lyme disease be sexually transmitted or passed from mother to unborn child?

6. Are there genetic factors that affect the course of the disease?
7. What is the geographic distribution and prevalence of Lyme disease?
8. Some patients have recovered and are well. What treatment made the difference?
9. What is the cost of illness associated with Lyme disease?
10. What role do co-infections play in the course of the illness?

We urge you to participate!

See lymedisease.org to learn more and register.

Want to share your story... Send it to us and we'll add it to the website under Stories! It's healing to write it out and might just be helpful to that one person that needs to hear it. Send about 1 to 2 pages to lymeutah@gmail.com

Immune Boosting Tip

Cut up a garlic clove, let sit for a few minutes to release the Allicin (active component of Garlic), then swallow the pieces with a glass of water, (don't chew them). I do this process at night.

Followed by breath mints ♥
~Steve Baugh

January Support Meeting Recap...

We met Saturday, January 20th at the South Jordan Library. There were about 40 people in attendance. Lori Holt conducted. Lori welcomed everyone and read ULDA's Mission Statement and Disclaimer. Lori had everyone briefly introduce themselves. We had a lot of new people there for the first time and many that had attended before. Even one member drove all the way from San Diego to see Dane's presentation. Lori turned the reminder of the time over to Dane.

Dane and his wife Aimee were so impressed with the number of people in attendance. He said their Florida group never had this many!

Dane shared about his illness and decision to use a frequency machine. When he committed to using it he knew that having a stress less life was beneficial. So he packed up his frequency machine and dog and headed to Moab, Utah. He spent 6 months there relaxing and using the GB4000. He feels it saved his life and brought him back to better health. Today, he is active and working. He also travels to share his success about frequency generators. So on his way out to Park City to ski with his wife, Dane reached out to our group to see if anyone wanted hear his message.

Dane brought the GB 4000 with a small amplifier and also the large plasma Mopa

amplifier. When Dane started using frequency machines, he used the smaller GB and Amp first, then moved onto the larger Mopa Amp in later years. He likes the broad sweep of the larger Amp. It is 100 % more powerful than the smaller Amp. The frequency can reach a large group of people compared to the smaller Amp where only about 4-6 can be connected to it at onetime. The Mopa has no handles, one just needs to be around it when the frequencies are going out.

These frequency type machines are used widely in Alternative Applications and many people are having success. Thank you for sharing, Dane!

Dane was born in Charlottesville, Virginia and raised in Salt Lake City, Utah where he graduated from the University of Utah with a Bachelor of Science

Degree. After college he purchased and remodeled homes in Pittsburgh before settling in Jacksonville in 1981. He started Boggs Construction Co. in 1983 where he remodeled and built Custom Homes along the First Coast until 2006. In 2004 Dane was diagnosed with Lyme Disease. He used oral antibiotics for one year and although he improved, he was

still sick. He then used intravenous antibiotics for a second year. They also helped him but not enough to beat the disease. As he says, "A stalemate had been reached between the Lyme and myself". He knew he had to try something different and he started using an Electrical Frequency Generator -Rife machine. Using certain electrical frequencies for Lyme he became much healthier. He attributes his return to health as a result of Rife technology and Reiki. In 2009 he and his wife Aimee formed the Northeast Florida Lyme Association - NEFLA with a few friends and Lyme Disease sufferers. In 2014 NEFLA became the

FLDA - Florida Lyme Disease Association. At that time Dane resigned from the FLDA to pursue his passions, Rife and Reiki. NEFLA's mission was to improve the prevention, diagnosis, and successful treatment of Lyme and related vector borne disease through education of the public and healthcare providers and the support of scientific research. The vision of NEFLA was a world where Lyme disease and other tick borne diseases are well understood, rapidly and accurately diagnosed, and where effective treatment is available to all patients. The FLDA continues this work.

Please note: ULDA does not endorse any company or treatments. We encourage Lyme patients to make their personal health decisions after careful study and discussing with their own healthcare providers.

HOW ULDA BEGAN...?

Many in the family of Marilyn & Charles Aiken of Lehi, Utah had acquired Lyme disease from the Lehi area. They reached out to others in Utah with similar symptoms as they had no support from the local medical community. I believe they talked with CALDA organization in California and learned of the new documentary Under Our Skin. It was 2009, and the Aikens took the initiative to book a place in Salt Lake City to show the movie. They had by then connected with others with similar symptoms. One family was Julie & Scott Everson. Julie was bit in Provo, Utah while caring for her daughter who had been thrown by her horse and received a head injury while attending BYU. Marilyn was too ill to carry on this new venture she had gotten started, so Julie and Scott stepped up to help. They had monthly meetings at Alta View Hospital and the group really started to grow. They usually

had about 10–15 people attend.

In February 2010, 8 months after the group started, Susan Ossola, Steve Baugh and Jenny Jones showed up.

Susan had her Lyme son, Steve was really bad off and Jenny was doing great! She was in the Mrs. Utah pageant and Lyme Disease was her platform message! Jenny went on to win Mrs. Utah! and became ULDA's Spokeswoman.

Later that year, Julie & Scott moved to Arizona and they turned the small organization over to Susan & Jenny. The women decided to grow it larger and make it a 501(c)(3). They enlisted Steve Baugh as Treasurer and Chrystal Wagner as Secretary. In 2011, with the help of Laurie Stringham, (Lyme member) they successfully got the non-profit started. Ron Lindorf (Lyme son) stepped in and helped with the large cost to file the papers.

In 2010 there were 50 people on the email list. Today, we have 450 people on the list! During those first years, along with Support, ULDA brought to the meetings many healthcare providers and health product presentations that made it so convenient to our members to get much needed information about this dreaded disease in one place. In 2013, they added Lori Holt to the Board. Lori serves as our current president for 2016.

We feel that as this disease is going rampant across Utah (albeit misdiagnosed!) that we were meant to be here at this time to help Make a Difference Together!

To the general membership, those who support online and those who have attended Support meetings—

Thank You!! ♥

ULDA Mission Statement

ULDA is a support group for Utahns, who have or suspect they have Lyme disease or other vector borne illnesses. ULDA offers education, resources and emotional support for sufferers and their families. ULDA strives to educate the general public, medical community and State & local government leadership about how prevalent and damaging this disease can be to the citizens of Utah. ULDA is working to bring more effective treatment protocols and better prevention measures in Utah.
